BULLETIN NUMBER GT546, 8 JULY 1992

Autozap Run 7016

This is a monthly run of autozaps which contains all zaps since run 7015.

Additional Notes on Upgrading to Sales Suite 6.2

Some additional notes on Sales Suite 6.2 are distributed with this zap run. The documentation code is MSSN6.2. This document contains extra advice when upgrading from version 6.0 or 6.1. It supplements the `Upgrading to version 6.1/6.2' training course but it does **not** replace it. We continue to recommend that resellers attend that training course before upgrading any existing sites to version 6.2.

Zaps and repackagings of particular interest

Stock Control V6.2
IC V6.2 zap 1, included on this run, prevents a problem during installation of Stock Control. Ensure that this zap is applied if upgrading from IC V6.1.

Sales Order Processing V6.2
An Exit 8002 at 43C0 can occur during close session in OP V6.2 if the old style sales analysis is in use and the system is multi-user. Zap 13 prevents this problem from occurring.
