

BULLETIN NUMBER GT547, 10 JULY 1992

Special Training Courses in July

In addition to our standard scheduled courses (please see enclosed booking form for dates) we are offering two 'specials' this month, details of which follow:

SALES SUITE UPDATE COURSE – 24th JULY

Due to popular demand we will be running the Sales Suite Update course on 24th July. This intensive one-day course explains the new features in Sales Suite version 6.2 which have been introduced since version 6.0 and is suitable for anyone with knowledge of version 6.0 wishing to upgrade to version 6.2. The course is particularly suitable for reseller support staff needing to learn the new features of version 6.2 as quickly as possible.

ADVANCED CONFIGURATIONS – 27th JULY

The popular Advanced Configurations course is also available this month; the course explains how to configure System Manager on BOS and topics covered include the bootstrap process, use of memory and extended memory and configuring disks, diskettes, printers and terminals.

We are also planning a hardware training course which will be available in the near future. If you have any other special training requirements for our staff or your customers please contact Kim Griffiths on 0753 662444.
