# Support for Obsolete Modules and Versions

## DROPPING MODULES AND VERSIONS

Every couple of years we look at the range of modules and versions which we currently sell and support and consider which have been superseded. This bulletin is formal notification of our intentions to drop items from our range of software for sale and support.

`No longer for sale' means we cannot guarantee to supply the module/version in question nor the associated documentation. In some cases we are able to supply software after the `no longer available for sale' date, but usually no documentation is available and the software may be supplied on unusual diskette formats; there is a £50 excess change for such generations of obsolete software.

`Supported until', we mean that we cannot guarantee to support the module/version in question after the date specified. We will do our best to help resellers with obsolete modules and versions and will support other modules at the site fully (unless their problems are associated with the obsolete item).

## TODAY'S ANNOUNCEMENTS

The following table lists the modules/versions which will be dropped and the relevant dates:

| Module code | Vers | Name of module | Date no longer for sale | Date supported until | Reasons for dropping |
|---|---|---|---|---|---|
| PL | 6.1 | Purchase Ledger | 31 May 93 | 30 Nov 94 | superseded by version 7.0 |
| AU | 6.1 | P/L Autopostings | 31 May 93 | 30 Nov 94 | see above |
| YL | 6.1 | P/L Tailoring | 31 May 93 | 30 Nov 94 | see above |
| SE | 3.0 | Speedbase Development | 30 Sep 93 | 31 Mar 94 | superseded by version 3.1 |
| CJ | all | Comms 3780 Emulation | 30 Sep 93 | 31 Mar 94 | obsolete EBCDIC based module |
| CG | all | Comms E-mail | 30 Sep 93 | 31 Mar 94 | superseded by industry–standard PC software |
| DK | all | Documentation Kit | 30 Sep 93 | 31 Mar 94 | out–of–date standards |
| QR,QS | 6.0 | PC Workstation | 30 Sep 93 | 31 Mar 94 | superseded by version 7.0 |
| RQ | all | Sales Ledger System request | 30 Sep 93 | 31 Mar 94 | documented in version 8.0 System Manager |
| QT,QU | 2.0 | SCO Hyperport driver | immediate | 30 Aug 93 | superseded by version 3.0 (with bug fixes) |

The port of Global System Manger to the Bull DPX/2 will no longer be available from 30th September 1993 nor supported from 31st March 1994.

## REMINDER ABOUT PREVIOUS ANNOUNCEMENTS WHICH TAKE EFFECT NOW

On 25th July default versions of various modules change. The default version of PC Workstation becomes 7.0. The default version of Speedbase Development becomes 3.1. The default version of Purchase Ledger (and its autoposting and tailoring modules) become 7.0. The default version of System Manager becomes 7.0. The default version of Job Costing becomes 1.3C. Please note that the Ledger Pack's constituent parts will change because of the change to the default version of Purchase Ledger and System Manager.

On 31st July version 6.2 of System Manager (and associated modules) ceases to be available.
