

## BULLETIN NUMBER GT572, 18 NOVEMBER 1992

# Global 2000 Sales Analysis operates with Global 3000 SOP

Global 2000 Sales Analysis version 6.2A is now available. This version will operate with either Global 2000 SOP or Invoicing (as before) or with Global 3000 SOP.

The exact interface details are:

- It will operate with version 6.2 of Global 2000 Sales Order Processing; or
- It will operate with version 6.2 of Global 2000 Invoicing; or
- It will operate with version 4.0 of Global 3000 Sales Order Processing.

Please note that an installation program has been supplied for Sales Analysis version 6.2A. This is supplied merely to allow operation of Sales Analysis at the same time at Global 3000. **If you wish to use Sales Analysis in conjunction with Global 2000 you must continue to use the Global 2000 SOP or Invoicing installation jobs; DO NOT USE ZTINS TO INSTALL SALES ANALYSIS FOR USE WITH GLOBAL 2000.** Therefore if you wish to interface to both - eg on a demonstration computer two copies of the Sales Analysis programs on two separate program units must be installed.

NB - Zaps OP-6.2-28, OP-6.2-29 and OP-6.2-30 (Global 2000 SOP) and VC-6.2-14 and VC-6.2-15 (Global 2000 Invoicing) need to be applied to the distribution diskettes of Global 2000 SOP and Global 2000 Invoicing before installing this version of Sales Analysis. These zaps are:-
