

BULLETIN NUMBER GT574, 2 DECEMBER 1992

Unix Hyperport Drivers

With immediate effect the drivers for operating the TIS Software Hyperport or HyperMx under SCO or Unix AT&T V5.4 will be available only from the hardware department in Wexham. This simplification is to ensure that the versions of the drivers correspond to the versions of the Hyperport or HyperMx being shipped.

When ordering a Hyperport or HyperMx for use with Unix please specify whether you require 3½" or 5¼" diskette format drivers.
