BULLETIN NUMBER GT575, 2 NOVEMBER 1992

System Manager V8.0 and Speedbase

This bulletin is to stress that System Manager V8.0 does not operate with any of the `independent' versions of Speedbase Presentation Manager. If you wish to run Speedbase applications under V8.0 and later versions of System Manager then System Manager PM must be ordered.

This is because the old `Speedbase Presentation Manager' has been integrated with System Manager to form System Manager PM V8.0. System Manager V8.0 assumes the version of Presentation Manager is also V8.0.
