

BULLETIN NUMBER GT591, 24 FEBRUARY 1993

## \$COBOL now available for System Manager (Unix)

The \$CTRAM module is now available for System Manager (Unix) configurations. This component enables \$COBOL to be used on computers running System Manager (Unix).

Details of the new module are described in Autozap MK6220.

For \$COBOL to operate with System Manager (Unix) new BACNAT software must be installed using the '-u' option of glinstall.

At the time of writing the following BACNATs have been upgraded to operate with \$COBOL:

|      |  |
|------|--|
| 5522 | SCO Unix 5¼" BACNAT variant 3.96                 |
| 5527 | SCO Unix 3½" BACNAT variant 3.96                 |
| 5535 | Motorola MPC-88 (5¼" floppy) BACNAT variant 3.94 |
| 5536 | Motorola MPC-88 (tape) BACNAT variant 3.94       |
| 5539 | IBM RS/6000 AIX V3.2 3½" BACNAT variant 3.95     |
