Global System Manager Supports NetWare version 3.12

A new release of Global System Manager for Novell NLM configurations is available. This release runs under NetWare 3.12 as well as NetWare 3.11. We have allocated this release the variant number 1.4.

The new software will be supplied as standard with configuration codes in the 5610 and 5611 ranges.

Please refer to the new edition of configuration notes C5610 for more details; particularly the installation details section. These can be ordered free of charge from the City office Production department.
