Autozap run 7035

This is a six monthly run of autozaps which contains all the zaps since run 7029. Autozap enquiry is also distributed with this run.

A number of recovery programs are included on the autozap diskette.

Product	Zap	Program
Global 2000 Purchase Ledger 6.1	70	PL61RH
Global 2000 Purchase Ledger 7.0	25	PL70RH
Global 2000 Purchase Ledger 7.1	33	PL71RH
Global 3000 Creditors Ledger 4.1A	26	ZR300B

Zaps PL6170, PL7025 and PL7133 prevent a problem where fully allocated invoices are displayed initially in account enquiry. Running Close Period or Purge Allocated Transactions causes the invoices to become historical again but the historical transactions will be displayed in transaction type order – the debits followed by the credits. Programs PL61RH, PL70RH and PL71RH sort the transactions in date order.

Tailoring zap j5–3.0–01 may require a further zap to be applied. See the zap description for further details. A copy of zap Z.5BR090 is included on the autozap diskette.

This autozap run includes repackaged Speedbase TAPs to be used in conjunction with the Global 3000 applications (zap EP8001); the use of these will be explained in a bulletin announcing version 4.2 of Global 3000 which is expected next week.

GLOBAL 3000 V4.1A SOURCES

As zaps for Global 3000 become available we update the documents which explain the zaps to those resellers who have purchased sources of Global 3000. The following table indicates which of the documents have been updated with descriptions of the zaps on this autozap run:

Product	Document Name	Date	Zaps Written Up
MWDZV4.1A	Debtors Ledger Source Zaps	4–Feb–94	9–20
