

Global 3000 version 4.2 sources now available

Following the release of Global 3000 version 4.2 last month, the sources are now available.

These sources are available to resellers who have signed a 'Global 3000 Source Contract' which defines the conditions under which sources are supplied; this is explained in detail in section 10.4.3 of the handbook. A Global 3000 Source Contract can be obtained from the City despatch department; please quote reference 'FGSA1291'.

Resellers who have already signed a source agreement and have received sources of earlier versions may order these versions at a copy charge like any other software.

The source of Global 3000 Cash Manager is available for the first time. The source of Global 3000 Intrastat is not available.

The source is released as eleven separate modules. Eight of these 11 modules are true sources: the 3 ledger sources, Cash Manager source, the 3 distribution sources and Product Maintenance source. The other three are special modules to help you use the sources: 'Source Routines', 'Documentation' and 'Development Tools'.

The source of the System Test is not yet available; it should be released in the week ending 6th May.

The attached document explains the detail of these eleven parts and the interfaces.

Sources of version 4.1A will be available until 31st January 1995 and supported until 30th April 1995.

WC GLOBAL 3000 CASH MANAGER SOURCE

General Description

List price is £1,500 irrespective of number of screens. Reseller discount on end-user source sales is not applicable (i.e. 0%). Software for a reseller's own use must be ordered at end-user prices.
