

# Upgrading System Manager without re-installation (clarification)

This bulletin describes in more detail the \$CUS price-level upgrade mechanism retro-fitted into System Manager V8.0 and described in Global technical bulletin GT614 (1 June 1993).

The following table shows where the \$CUS mechanism is possible; in those cases where it is not possible the software will need to be reordered.

<i>Price code</i>	<i>Screens</i>	<i>Is a non-LAN configuration upgradable using \$CUS?</i>	<i>Is a LAN configuration upgradable using \$CUS?</i>
A	1	No	Yes
B	2 to 3	No	Yes
X	4 to 7	Yes	Yes
Y	8 to 12	Yes	Yes
D	13 to 24	Yes	Yes
E	25 to 39	Yes	Yes
F	40 to 59	Yes	Yes
G	60 to 99	No	Yes

Note that the following upgrades are NOT possible using \$CUS:–

Concurrent System Manager (level 3) to multi-user System Manager (level 4);

Concurrent System Manager (level 3) to multi-user System Manager (level 5);

Multi-user System Manager (level 4) to multi-user System Manager (level 5).

See section 10.5.4.1 of the Global Reseller Handbook for a definition of the term "level number".
