Update on Payroll version 6.2

SOFTWARE RELEASE

Payroll version 6.2 is now approaching the completion of the quality assurance phase. Pending final testing today and tomorrow and some regression beta–testing taking place over the bank holiday weekend we can say that the software should be released on Tuesday 3rd May. The BBS will be updated at noon on Tuesday with the status.

We expect to ship many hundreds of orders in the week ending Friday 6th May and these orders will be sent on a first come first served basis. One day turnaround is suspended.

If you do have items which need to go out early please liaise with Tricia O'Donnell in the software production department.

The following will not be available as part of the initial release:–

- · Payroll Tailoring Kit
- · Record Layouts
- · Payroll Autoposting
- · Label Print
- · Interface to Global 3000 Cash Manager

OPERATION OF VERSION 6.1 DURING WEEK ENDING 6TH MAY

A rates file recently distributed with bulletin GT663 expires on the 1st May 1994. There is no harm in extending this date by a few days to say the 14th May 1994. This can be done using the `Amend Tax Rates' function from the `Amend Rates' option of `System Maintenance'. Key S to amend the rates file end date from 01/05/94 to 14/05/94. Finally confirm the rest of the screens to exit the program.

For further details please refer to page 5–55 of the Payroll manual.
