

Autozap run 7039

This is a monthly run of autozaps which contains all zaps since run 7038.

Recovery program GLPOST is included on this autozap run for zap ZG4216. To recover the data run GLPOST to change the status of the period in question to C (closed) and then re-open the period in General Ledger.

Note: Zaps ZD4A22 and ZP4A29 are corrupt and will not apply automatically to your program library. The correct zaps will be issued with next months autozap run. Contact the Service Centre if you require these zaps sooner.

BACS V6.2

Zaps PB6201 and PB6202 are included on this autozap run to resolve two of the problems detailed in Reseller Bulletin GT680:

1. Under certain circumstances, submissions to BACS on 3½ inch diskettes are rejected with the reason "DISKETTE SUBMITTED IN EBCDIC CHAR CODE".
2. Under certain circumstances if submissions to BACS are made using Global Comms the "Run Global Communications" option fails with "\$91 JOB MANAGEMENT TERMINATED".

If BACS V6.2 is installed where the diskette drive is a high capacity 5¼ inch drive and you attempt to use low capacity diskette formats C10A or C24A, this is not accepted. BACS do not accept data on high capacity 5¼ diskettes or if low capacity diskettes are formatted on a high density drive, so the system rejects C10A and C24A formats. We recommend a low density diskette drive be used to produce diskettes for BACS submission.

When installing BACS, configure the system to use Global Comms and amend the PBT assignment to the low capacity formats afterwards.

GLOBAL 3000 SOURCES

As zaps for Global 3000 become available we update the documents which explain the zaps to those resellers who have purchased sources of Global 3000. The following table indicates which of the documents have been updated with descriptions of the zaps on this autozap run.
