

Autozaps on B3B diskettes - a reminder

This bulletin is to remind our customers that autozaps will no longer be available on double sided low-density 3½ inch diskettes (B3B format) from the 1st November 1994. If resellers have a requirement to continue to receive autozaps for any customers who have B3B as the format (or for their own use) please notify Debra Waite, Support Administrator, as soon as possible, indicating the name and ideally the serial number of the client and the preferred new format for autozaps (G1A or O2A).
