

Payroll V6.2 SMP Update

An error has been found in the rates file distributed with Payroll V6.2. The "weeks prior to EWC for QW" parameter in the Amend SSP/SMP rates option should be 15, instead of 11.

The qualifying week (QW) is the 15th week before the start of the expected week of confinement.

After correcting the parameter, recalculate average pay for those employees entitled to SMP and adjust the higher rate of SMP and cumulative SMP to date accordingly.
