

## **Payroll - end of year on magnetic media**

A facility was added to Global Payroll 6.2 to produce end of year returns on magnetic media, but this could not be tested as test submissions are only accepted by the contributions agency starting in October.

We will be making a test submission for Global Business Systems during the next few weeks. Since we have not been able to test the software so far, it is quite likely that there will be problems, and if so we will produce ZAPs.

We recommend that other payroll users should not attempt test submissions until we have successfully completed our tests, when we will issue another bulletin.
