

## **Global 3000 - C-ISAM licensing**

Since the initial release of Global 3000, users of Global System Manager (Unix) have had the cost of the run-time licence for C-ISAM incorporated into the purchase price of Global System Manager PM. This was achieved by Misys negotiating a bulk deal with Informix covering all software including Global and Strategix.

The bulk deal ends on 31st December 1994. Misys are currently in negotiation for a new contract with Informix. Should the cost of the run-time licence substantially increase Global Business Systems may have to pass a proportion of that cost onto its new C-ISAM based users for new sites.

A further bulletin will be issued in the next few weeks when we will update our resellers with any developments.
