TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT726, 1 DECEMBER 1994

Global 3000 database structures course

As announced at the reseller conference we will be running a free one-day training course with the aim of helping support staff gain an in-depth understanding of **Global 3000**.

The course will give information on the internal structure of **Global 3000** databases. It will cover the relationships between records on the databases and will explain the meaning of various flag fields. Course notes will be provided and will include useful structure diagrams.

Attendees should already have attended the three day **Global 3000** Overview course or have a good working knowledge of the applications. A prior knowledge of Reporter would be useful but relevant aspects of Speedquery will be explained.

The course will take place on **9 December 1994** at Bourne End. Course places are strictly limited, we would recommend an early booking. To book a place please fill in a standard training course booking form but mark it "Free of Charge".

Also running in December are the following courses:-

- · Reporter
- · Installing GSM (Novell)
- · GSM Operations
- · Global 3000 Overview

Please contact our course registrar Gail McGrath on 01628 532565 for further details.
