BULLETIN GT745, 30 MARCH 1995

Payroll V6.3 Update

A problem has been discovered with the rates file issued with Payroll V6.3 valid from 06/04/95. The average pay for Rate A should be 58.00 upwards and for Rate B should be 0.00 to 57.99. Use the Amend SSP/SMP rates option from the Amend Rates menu to correct the average pay amounts.

If SSP payments have already been generated, enter temporary payments and use Adjust cumulative data to amend the gross SSP to date figures for the employees concerned. It may be necessary to post journals directly to the Nominal Ledger to correct the accounts concerned.

Orders for Payroll V6.3 generated from 30th March onwards will contain the corrected version of the rates file, PRR03.
