**BULLETIN NUMBER GT746, 4 APRIL 1995**

## **Speedbase V8.1A (Btrieve) now on evaluation**

A new version (V8.1A) of Global System Manager PM, which has an option to hold a Speedbase database in Btrieve format on a Novell fileserver, is currently being evaluated. The Speedbase Database Manager runs as an NLM on the Novell fileserver, giving considerable performance improvements deriving from a much improved client/server architecture. Furthermore, the use of "open" Btrieve files and locking allows easier integration with many with many non Global 3000 applications and packages including, for example, Microsoft Access.

We will keep you updated as to progress and hope to circulate details of a testing programme shortly.
