AUTOZAPS

A copy of the Autozap enquiry will be placed on the Bulletin Board on a monthly basis, in addition to the copy distributed to resellers on a quarterly basis. A new option has been introduced to Autozap enquiry as a Global Reporter program to produce zapped component listings. For a given product, the report prints the components in program order with the current program date, latest zap number, zap type and history. A table of all zaps and repackages required to bring the program library up to date is also included.

The new reporting option and the availability of Autozap enquiry on a monthly basis will enable resellers to check that sites are running with up to date programs more easily.

The file on the Bulletin Board is called AZENQ.ZIP and is available for this autozap run.

GLOBAL PAYROLL

This autozap run contains zaps for Payroll V6.2 and PR V6.3 which affect End of Year processing. The zaps are PR-6.2-39, PR-6.2-40 and PR-6.3-02. Zap PR-6.2-40 and PR-6.3-02 are documented fully in Technical Bulletin GT744.

GLOBAL 3000 SOURCES

The source code master diskettes for the Global 3000 applications have recently been revised to include only the most recent version of each source. This will continue on a monthly basis in line with Autozaps.
