### **GLOBAL 3000 PRODUCT MAINTENANCE V4.2**

A problem has been discovered with zap ZM4224 which is included on this autozap run. It causes an EXIT 25544 to occur attempting to access the ledgers. Do not apply the repackage of LM015 (dated 2/1/95) to the P.LM3000 library.

### **AUTOZAPS**

A copy of the Autozap Enquiry will be placed on the Bulletin Board on a monthly basis, in addition to the copy distributed to resellers on a quarterly basis. A new option has been introduced to Autozap Enquiry as a Global Reporter program to produce zapped component listings. For a given product, the report prints the components in program order with the current program date, latest zap number, zap type and history. A table of all zaps and repackages required to bring the program library up to date is also included.

The new reporting option and the availability of Autozap Enquiry on a monthly basis will enable resellers to check that sites are running with up to

date programs more easily.

The file on the Bulletin Board is called AZENQ.ZIP.

### **GLOBAL 3000 ENHANCEMENTS**

Two enhancements to the Global 3000 V4.2 applications have been issued as zaps on this autozap run.

<i><b>Enhancement Notes Zaps</b></i>	<i><b>Enhancement</b></i>

MZPGV4.2 – Non Consolidated payments	ZD4286 ZD4287

### **GLOBAL 3000 SOURCES**

The source code master diskettes for the Global 3000 applications have recently been revised to include only the most recent version of each source. This will continue on a monthly basis in line with Autozaps.
