

TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN GT788, 2 FEBRUARY 1996

Product Release Report Payroll Version 6.4

Global Payroll Version 6.4 is due to enter QC on 9th February 1996 and due for release 1st March 1996.

We would like to involve resellers in the testing of this release. If you are interested in contributing to our testing please contact Richard Andrews at our City office.

Global Payroll V6.4		
Project Summary	Project No Bulletin No	Scheduled Date Version/Strea m
Payroll P45 changes. This enhancement affects Global Payroll. From 6 th April 1996 legislative changes alter the information required on P45 continuous stationery forms. The content of the form has not altered but conditions governing the appearance/non-appearance of information in boxes 6 and 7 have changed. Status: Coding complete.	95226	01/03/1996 6.4 Main
Retention of Payroll history. This enhancement affects Global Payroll Enquiries. Payslip history now includes details for employees who have left. Each payslip record now offers SSP, SMP, car usage and Class 1 NIC payment details. A new holiday register records holiday days taken for current and past holiday years. All enquiries are available for past and present employees and data may be retained for as long as you wish. Status: Coding complete.	95228	01/03/1996 6.4 Main
Class 1A NICS improvements. This enhancement affects Global Payroll. From April 6 th 1996 legislative changes require a new layout for statutory P11D continuous stationery forms. This feature provides the form required and also offers improved dialogue in the Update Employee Class 1A NIC program. Car value is broken into three parts, original market value, accessories fitted and accessories added. New fields include car usage start and end dates. The fuel liability calculation has altered and a number of other minor improvements have been made. Status: Coding complete.	95230	01/03/1996 6.4 Main
An improved Payroll calculation run. This enhancement affects Global Payroll. A number of issues have been resolved in the calculation run. These include a problem with SMP, a problem with tax code X, a problem with NI calculations and an improvement	95252	01/03/1996 6.4 Main
