**BULLETIN NUMBER GT796, 7 MAY 1996**

## **Update to Autozap Run 7061**

A problem has been discovered with Autozap run 7061 on 02A generations.

Zaps ZD4F01, ZG4274 and parts of zaps ZD4B11 and ZI4347 are missing from the first diskette. Do not apply any part of zaps ZD4B11 or ZI4247 as this will result in a STOP 25543 or EXIT 25544 running Debtors Ledger Transaction Entry or Stock Control Transaction Entry.

The above zaps are available from the Bulletin Board and will be available in the three monthly Autozap run 7062 which will be distributed this month.
