

TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT801, 20 JUNE 1996

Global System Manager version 8.1 now available for Unix configurations

Global Business Systems is pleased to announce the availability of Global System Manager version 8.1 for most of the existing V8.0 Unix configurations. In addition, the following new versions of Unix are now supported:-

HP-UX version 10
SCO OpenServer System 5

Users of Speedbase C-ISAM are strongly recommended to upgrade to this release of Global System Manager (Unix) because it corrects a number of problems present in V8.0 and the V8.1 beta-release of Global System Manager (Unix). Note that the version of C-ISAM included in the SCO Unix BACNAT software for configurations 5527, 5545 and 5552 has been upgraded from V4.10 to V5.05. Please consult the Global Configuration Notes for further details. Users of Speedbase C-ISAM should also be aware of the change to C-ISAM pricing as described in Global Sales Bulletin GS119 (6-October-1995).
