BULLETIN NUMBER GT802, 21 JUNE 1996

Autozap Run 7063

This is a monthly run of autozaps which contains all zaps since run 7062.

GLOBAL 2000 ENHANCEMENTS

This autozap run contains zap BF1027 which allows Global Finder V1.0 to handle date keys correctly where the dates stored are after 31/12/99. Please note this zap will only work if Global Finder is run on GSM V7.0 or later. If Global Finder is run on an earlier version of GSM a PGM CHK will occur.

An enhancement to the Uninvoiced Deliveries report in Purchase Order Manager V7.1 has been introduced as zap PM7152. It is now possible to print uninvoiced deliveries up to a user specified cut-off date.

AUTOZAPS

Please note that this autozap run contains zaps for V4.2F of the Global 3000 enhancement stream. It is recommended that the Global 3000 zaps are created on a module by module basis to avoid the possibility of updating the Global 3000 V4.2 program libraries with programs for a later version of the software.

GLOBAL 3000 SOURCES

The source code master diskettes for the Global 3000 V4.2 applications have recently been revised to include only the most recent version of each source. This will continue on a monthly basis in line with Autozaps.
