

TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT803, 8 JULY 1996

Tape hardware supported by \$TAPE

The following tape controller cards and tape drives are supported by \$TAPE on Global System Manager (BOS) configurations (this table replaces the information contained in Global Technical Bulletin GT-799, 22-May-1996):-

<i>Name</i>	<i>Controller card</i>	<i>Tape drive</i>	<i>Notes</i>

 (new) Adaptec AHA-1510A (ISA) Tandberg TDC-3820 (525Mb) See
 note-3

Note 1 The MCA-bus version of the Archive QIC-02 host adapter card (Archive VP-409) is NOT supported.

Note 2 These controller card/tape drive combinations are only supported by the TF \$TAPE product. They are NOT supported by the TE \$TAPE product.

Note 3 The high performance TDC-3820 tape drive may not stream on all computers when attached to the non-DMA'ed AHA-1510A host adapter card.

Note 4 This controller-card/tape-drive combination is no longer available.

Note 5 Only the following members of the Adaptec intelligent host adapter card family are supported by the ADAPTEC and AHA-TAPE controllers:-

AHA-1540A, AHA-1542A
 AHA-1540B, AHA-1542B
 AHA-1540CF, AHA-1542CF
 AHA-1542CP, AHA-1542CP (the Plug-N-Play option MUST be disabled)
 AHA-1640x, AHA-1642x

All the other members of the Adaptec intelligent host adapter card family (e.g. the AHA-1740, AHA-1840, AHA-1940 and AHA-2940) are NOT supported by the ADAPTEC or AHA-TAPE controllers.

Please refer to the Global Operating Manual (BOS) for full details of the Adaptec AHA-154nx and AHA-1640x SCSI host adapter cards supported by \$TAPE.

The following tape controller cards and tape drives are supported by \$TAPE on Global System Manager (MS-DOS and Windows) and Global System Manager (Novell NetWare) configurations (this table replaces the information contained in Appendix D of the Global Tape 7.0 Manual):-

(new)	Adaptec AHA-1510A (ISA) Tandberg TDC-3820 (525Mb) See note-3		
ASPI	Any Adaptec controller card and SCSI tape drive supported by the ASPI.SYS device manager family. There are MS-DOS ASPI device managers for all the SCSI host adapters produced by Adaptec. All these device drivers provide a common interface to the SCSI tape devices attached to the host adapter card. This implies that the ASPI \$TAPE controller SHOULD work with any member of the Adaptec host adapter family. The ASPI \$TAPE controller has only been tested with, and is only supported on, the following Adaptec host adapter cards:-		

Host adapter card MS-DOS device manager

AHA-1542CF	ASPI4DOS.SYS
AHA-1540CF	ASPI4DOS.SYS
AHA-1542CP	ASPI4DOS.SYS
AHA-1510A	ASPI2DOS.SYS

In particular, the ASPI controller has NOT been tested with the AHA-1740, AHA-1840, AHA-1940, AHA-2940, or later Adaptec host adapter cards.

- Note 1 The MCA-bus version of the Archive QIC-02 host adapter card (Archive VP-409) is NOT supported.
- Note 2 These controller card/tape drive combinations are only supported by the TF \$TAPE product. They are NOT supported by the TE \$TAPE product.
- Note 3 The high performance TDC-3820 tape drive may not stream on all computers when attached to the non-DMA'ed AHA-1510A host adapter card.
- Note 4 This controller-card/tape-drive combination is no longer available.
- Note 5 Only the following members of the Adaptec intelligent host adapter card family are supported by the ADAPTEC and AHA-TAPE controllers:-

AHA-1540A, AHA-1542A
AHA-1540B, AHA-1542B
AHA-1540CF, AHA-1542CF
AHA-1542CP, AHA-1542CP (the Plug-N-Play option MUST be disabled)
AHA-1640x, AHA-1642x

All the other members of the Adaptec intelligent host adapter card family (e.g. the AHA-1740, AHA-1840, AHA-1940 and AHA-2940) are NOT supported by the ADAPTEC or AHA-TAPE controllers.

Please refer to the Global Operating Manual (MS-DOS and Windows) and Global Operating Manual (Novell NetWare) for full details of the Adaptec AHA-154nx and AHA-1640x SCSI host adapter cards supported by \$TAPE. IMPORTANT NOTE: The ADAPTEC/AHA-TAPE tape controller does not function correctly when Global System Manager is running under any version of Microsoft Windows. The ASPI controller must be selected if \$TAPE is to be used when Global System Manager is running under any version of Microsoft Windows.

Note also that the ASPI tape controller requires an MS-DOS device driver to be loaded. This device driver MUST be loaded via an entry in the

CONFIG.SYS file. The Windows 95 Adaptec drivers supplied with Windows 95 DO NOT provide the ASPI service required by the ASPI \$TAPE controller.

The drives supported by \$TAPE on Global System Manager (Unix) configurations are described in the relevant Global Configuration Notes.

The \$TAPE TG product has been withdrawn. This product included support for only the Adaptec AHA-1510A host adapter card using the AIC6360 controller. The AIC6360 controller is now included both the TE and TF products.

To summarise, the following \$TAPE products are now available:-

TE Global Tape Utility (General)
TF Global Tape Utility (Exabyte and DAT)

The full range of Global System Manager (BOS) and Global System Manager (MS-DOS and Windows) \$TAPE controllers included in the P.\$TAPE library is as follows:-

<i>Name</i>	<i>Description</i>
J5CT03, JWCT03	Adaptec AHA-154 nx or AHA-1640x
J5CT04, JWCT04	Everex/Wangtek QIC-02
J5CT08, JWCT08	Archive Viper QIC-02
JWCT09	Generic ASPI
J5CT0B, JWCT0B	Adaptec AHA-1510A
