TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT804, 9 JULY 1996

Global and the year 2000

Global Business Systems is pleased to announce that all currently supported Global applications (both 2000 and 3000) support dates in the 21st century provided they are running on currently supported versions of Global System Manager.

Recent fixes have been created for Nominal Ledger V6.0 and Finder V1.0.

As explained in technical bulletin GT787 dated 31 January 1996, 21st century date handling requires the setting of a `century start date' using $CUS. Full details of the implications of this for developers and users can be found in that bulletin.
