

## **TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS**

**BULLETIN NUMBER GT815, 22 OCTOBER 1996**

### **Autozap Run 7065 Update**

A copy of the six monthly Autozap run 7065 is currently being distributed to all resellers together with monthly Autozap run 7066.

The six monthly Autozap run 7065 covers 10 O2A diskettes. Due to the number of diskettes required to distribute the entire run to all users, the run has been split and a cut down version of the run excluding all Global 3000 repackages is available for resellers and users of Global 2000 applications on request.

If any of your sites require their own copy of Autozap run 7065 please send your request in writing for the attention of Wendy Cook at the City office, listing the sites, their serial numbers and whether they require the full or cut down version of the run.

For resellers with sites running Global 3000 applications, a copy of all repackages for Global 3000 V4.2 applications extracted into libraries of the form P.xx7065 (where xx is the zap module id) is available in file G427065.ZP on the Bulletin Board.

All zaps included on Autozap run 7065 are available from the Bulletin in the approved zaps area.
