

***TECHNICAL BULLETIN FROM GLOBAL BUSINESS
SYSTEMS***

BULLETIN NUMBER GT824, 22 JANUARY 1997

**Release of Global
Integrator V2.2**

This bulletin announces the release of Global Integrator V2.2. This release includes support for Windows NT in preparation for the imminent release of Global System Manager (Windows NT) and a revised Global Integrator Manual (document name MDIMV2.2).

In addition to the new manual, we have taken the opportunity to repackaging Global Integrator in order to fix a few minor problems.
