TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT846, 3 NOVEMBER 1997

Speedbase Btrieve for Windows NT now available

Release of Global System Manager Global System Manager PM V8.1 revision h

Including enhancements to:
Global Cobol Development System
Global Speedbase Development System

Global Business Systems is pleased to announce the availability of Global System Manager V8.1 revision h and Speedbase Btrieve for Windows NT.

The main features of this release are:-

· Support of Speedbase Btrieve on Global System Manager (Windows NT) configurations. This release allows the creation, maintenance and use of Btrieve format Speedbase databases on Global System Manager (Windows NT) configurations when used in conjunction with the Speedbase Btrieve Gateway for Windows NT;

· Several enhancements to the Global System Manager (Windows NT) nucleus including the release of the Speedbase Btrieve Gateway and support of "thin clients" connected to a central Global client via TCP/IP;

· Improvements to several Global System Manager utilities and System Requests (particularly $AUTH, $S, $SPOOL, $U);

Global System Manager V8.1 revision h, and the Speedbase Btrieve Gateway, are fully described in the Global System Manager V8.1 Notes (document MSMNV8.1). This document will be despatched with all Global System Manager orders generated after 3rd November 1997.

Global System Manager V8.1 revision h is available free of charge for all users on service who are upgrading from Global System Manager V8.1 of the same level and family (any revision). The Global System Manager Notes (document MSMNV8.1) can be ordered from the Production Department and are freely available on the BBS.
