TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT855, 20 FEBRUARY 1998

Autozap Run 7078

This is a monthly run of Autozaps which contains all zaps since run 7077.

GLOBAL 2000 ENHANCEMENTS

Zap SL-6.3-89 allows Autopostings to be run under job management.

GLOBAL 3000 ENHANCEMENTS

Zap ZI-4.3-42 enhances the Stock Availability report with an additional option to print serialised stock only.

Zap ZM-4.3-47 introduces a new parameter `Automatically create Company/Supplier details' to govern input of orders and invoices in POP. It can be used to prevent the accidental entry of transactions for suppliers who do not trade with the currently selected company. This zap must be applied in conjunction with zap ZO4332.

Zap ZO-4.3-31 enhances the Orders by Supplier report by introducing the option to exclude completely delivered order lines from the report.

Zaps ZO4333, ZP4376 and ZP4377 introduce the option to mark an account as `held'. This prevents the entry of purchase orders and invoices in POP and all transactions in CL for held accounts.

GLOBAL SYSTEM MANAGER

Attached to this bulletin is a document listing the latest BACNAT variants for every Global System Manager V8.1 Unix configuration, together with a list of those variants created during January 1998.
