

# ***TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS***

BULLETIN NUMBER GT861, 6 APRIL 1998

## **AHA-2940 PCI SCSI Host Adapter card supported with GSM (BOS)**

Global Business Systems is pleased to announce support of the Adaptec AHA-2940 PCI SCSI host adapter card with GSM (BOS).

The following new GSM (BOS) configurations are available:-

|         |   |
|---------|---|
| 5714    | GSM (BOS), 3½" diskette, PCI-bus, AHA-2940 disk & tape, |
| non-LAN |   |
| 5715    | GSM (BOS), 3½" diskette, PCI-bus, AHA-2940 disk & tape, |
| LAN     |   |

Please refer to the GSM (BOS) PCI-bus Global Configuration Notes (document C5714) for further details.

There are key benefits which the Adaptec AHA-2940 offers over its ISA counterpart, the AHA-1542CP. This will be of particular interest to Reseller sales and technical personnel.

The main advantages are as follows:

- Frees up an ISA slot as it uses the PCI interface thus allowing greater flexibility of slot usage.
- It offers faster data transfer rate, up to 4 times that of the AHA-1542CP (20MB/s Ultra and 40MB/s Ultra Wide).
- Both Ultra and Ultra Wide are supported.

With the continued increases in hard disk size the AHA-2940 is the most popular and appropriate SCSI interface to deal with data management strategy.

Our hardware department will be pleased to supply competitive pricing on the full range of Adaptec cards. Please contact Dave Thompson on 01628 532 565 or email [hwsales@tissoft.co.uk](mailto:hwsales@tissoft.co.uk).
