BULLETIN NUMBER GT866, 21 MAY 1998

Auxiliary printing now supported on the Hyperport family

SUMMARY

`Back-of-screen' printing is now available on all screens connected via Hyperport controllers on BOS, MS-DOS and Novell variants of Global System Manager.

DETAILS

The recently released V4.7 Global System Manager (BOS) nucleus software includes
support for auxiliary printing (aka `back-of-screen' printing) on all members of the Hyperport intelligent controller family (i.e. TIS Hyperport, Hyper/MX, GlobeServer, Superport and PCC/Ni). The updated components are also included in the V4.7 Global System Manager (MS-DOS) and Global System Manager (Novell NetWare) nucleus libraries.

Please refer to the Global System Manager V8.1 notes dated May 1998 (MSMNV8.1) for further details.

The V4.7 Global System Manager nucleus software is included in all V8.0 and V8.1 systems generated after 18 May 1998.

To obtain the new components either order a regeneration or down-load file GSM47S.ZIP from the BBS.

If you have any questions regarding the above information please contact the Service Centre at the City office.
