

## **TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS**

**BULLETIN NUMBER GT877, 8 OCTOBER 1998**

# **Speedbase SQL Server Beta Test now available**

Global Business Systems is pleased to announce the beta release of a version of GSM PM (Windows NT) that includes the ability to hold Speedbase databases in SQL V6.5 format (such databases are referred to as "SQL format Speedbase databases").

We are looking for up to six sites, both reseller and end-user, that wish to utilise the new facilities offered with this release.

The following points should be realised:-

- The site must already be running GSM PM (Windows NT);
- Any problems in the beta-test software should be faxed to the Hotline in the normal way. After they are logged they will be passed directly to development for a response;
- The SQL Server V6.5 software is not supplied by Global Business Systems. It must be obtained from a Microsoft distributor.

If you, or one of your end-users, wish to become a beta test site for Speedbase SQL please email Alan Underwood ([alan@tissoft.co.uk](mailto:alan@tissoft.co.uk)).
