

# **TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS**

**BULLETIN NUMBER GT884, 7 DECEMBER 1998**

## **Release of Global System Manager and Global System Manager V8.1 revision i**

**Including enhancements to:**  
**Global Cobol Development System**  
**Global Speedbase Development System**

Global Business Systems is pleased to announce the availability of Global System Manager V8.1 revision i.

**Global 3000 V4.5 is closely integrated with Global System Manager PM V8.1i. If you are planning to install Global 3000 V4.5 this version of Global System Manager MUST be used.**

Due to enhancements to the menu handler, changes to the menu drivers for Global 3000 V4.3 and V4.4 are required. If you intend to upgrade sites running Global 3000 V4.3 or V4.4 to this version of Global System Manager you will need to apply zap ZM4358 or zap ZM4424. Revised menu files to take advantage of the 'Pop-menus' functionality are available in files MENU43 and MENU44. The zaps and menu files will be available from the support section of the Global Web Site and the Bulletin Board.

Although GSM V8.1i is essentially a maintenance release a large number of new features have been included. Please refer to the Global System Manager V8.1 Notes (document MSNMV8.1) for a complete list of enhancements.

Global System Manager V8.1i is available free of charge for all users on service who are upgrading from Global System Manager V8.1 (any revision) of the same level and family. The Global System Manager Notes (document MSMNV8.1) can be ordered from the Production Department and are freely available on the Bulletin Board and Global Web Site.

If you have any questions regarding the above information please contact the

Service Centre at the City office.
