

# **TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS**

**BULLETIN NUMBER GT886, 7 DECEMBER 1998**

## **Global System Manager (Windows NT) BACNAT V2.7**

The V2.6 Global System Manager (Windows NT) BACNAT software has been extensively revised to produce revision V2.7. The main feature of the V2.7 BACNAT software is the inclusion of the V2.3 Global Windows Workstation (GUI) standard into the Global Client, GLOBAL.EXE.

Global 3000 V4.5 is closely integrated with both the V2.3 Global Windows Workstation standard and the V2.7 Global System Manager (Windows NT) nucleus. **If you are planning to install Global 3000 V4.5 on Global System Manager (Windows NT) this version of the BACNAT software MUST be used.**

The new features present in the V2.7 BACNAT software include:

- The V2.3 GUI standard incorporated in GLOBAL.EXE V2.7 provides a large number of bug fixes and enhancements. Please refer to Global Technical Bulletin GT880 and the GUI V2.3 Notes (MGUNV2.3) for further details regarding the V2.3 GUI features.
- The V2.3 GUI product is now distributed with the Global System Manager (Windows NT) BACNAT software;
- Serial consoles are now supported on Windows 95 and Windows 98;
- The Global Client executable files, GLOBAL.EXE and GLCONS.EXE, and the Global Server executable file, GLSERVER.EXE, include several further enhancements (see the Global System Manager V8.1 Notes (MSMV8.1) for further details).

The V2.7 Global System Manager (Windows NT) BACNAT software will operate with any revision of Global System Manager V8.1. The V2.7 Global System Manager (Windows NT) BACNAT software is available at a copy charge for all users on service who are upgrading from Global System Manager (Windows NT).

If you have any questions regarding the above information please contact the Service Centre at the City office.
