

TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT902, 26 NOVEMBER 1999

Speedbase Btrieve and Pervasive SQL 2000 (Btrieve V7.5)

This bulletin announces the formal certification and support of Speedbase Btrieve on Pervasive SQL 2000 (aka Btrieve 7.5) for both GSM (Novell) and GSN (Windows NT) configurations.

No changes to the current Speedbase Btrieve Gateway (SPEEDBAS.EXE), Speedbase Btrieve NLM (SPEEDBAS.NLM), Speedbase utilities (e.g. \$BADN) or sub-routines (e.g. BA\$OPN) are required. All existing Btrieve-aware applications that operate on Btrieve 7 will operate unchanged on Pervasive SQL 2000.

Please refer to the Global Configuration Notes for Windows NT (C5660), the Global Configuration Notes for Novell (C5611) and the GSM V8.1 Notes (MSMN8.1) for further details.

If you have any questions regarding the above information please contact the Service Centre at the City office.
