

TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT921, 9 AUGUST 2001

Withdrawal of GSM (Windows) diskette distribution configuration (5661)

The many recent enhancements in GSM (Windows) have greatly increased the size of the software that is generated and distributed to fulfill an order for GSM (Windows). This size increase, which affects both the GSM run-time software (e.g. BACRES, BEA, HAA etc.) and the BACNAT components (i.e. GLOBAL.EXE etc.), has made it very difficult to distribute GSM (Windows) on 3½" diskettes. Consequently, configuration code 5661 will not be available after Friday 31st August 2001.

All orders for GSM (Windows) after the 31st August 2001 must specify configuration code 5663 (CD distribution).

If you have any queries regarding the above information please contact Alan Underwood (alan@tisoft.co.uk) at the City office.
