TECHNICAL BULLETIN FROM GLOBAL BUSINESS SYSTEMS

BULLETIN NUMBER GT927, 12 DECEMBER 2002

GSM (Unix) Configurations

This bulletin announces some important changes to the distribution of GSM (Unix) configurations.

All GSM (Unix) configurations for diskette, QIC tape and DAT tape distribution have been replaced by a series of configurations for distribution on CD. The following tables explain the changes:

Table-1 GSM (Unix) configurations before November 2002

Config. Code	Unix version(s)	C-ISAM Supported?	Distribution media	Replaced by	Notes
5527	SCO Unix	Yes	3" diskette	5552	2
5529	Motorola Delta	No	QIC tape	Withdrawn	1
5536	Motorola MPC-88	Yes	QIC tape	Withdrawn	1
5539	AIX V3.2.5	Yes	3" diskette	5551	3
5540	HP-UX V11.0	Yes	3" diskette	5550	4
5541	HP-UX V11.0	Yes	QIC tape	5550	4
5544	AIX V3.2.5	Yes	QIC tape	5551	3
5545	SCO Unix	Yes	QIC tape	5552	2
5547	MPC-88 SVR4	No	QIC tape	Withdrawn	1
5550	HP-UX V11.0	Yes	DAT	5550	4
5551	AIX V3.2.5	Yes	DAT	5551	3
5552	SCO Unix	Yes	DAT	5552	2
5554	AIX V4.3	No	QIC tape	5557	5
5557	AIX V4.3	No	DAT	5557	5
5558	AIX V4.3	No	3" diskette	5557	5
5567	SCO Unix	No	3" diskette	5592	2
5576	Motorola MPC-88	No	QIC tape	Withdrawn	1
5579	AIX V3.2.5	No	3"diskette	5591	3
5580	HP-UX V11.0	No	3" diskette	5590	4
5581	HP-UX V11.0	No	QIC tape	5590	4
5584	AIX V3.2.5	No	QIC tape	5591	3
5585	SCO Unix	No	QIC tape	5592	2
5590	HP-UX V11.0	No	DAT	5590	4
5591	AIX V3.2.5	No	DAT	5591	3
5592	SCO Unix	No	DAT	5592	2

Note-1   These versions of GSM (Unix) are no longer available. The support policy for these versions of Unix is described in section 3.0.4d of the Global Reseller Handbook Issue 19.

Note-2   GSM (Unix) for SCO Unix is now only available on a Windows format CD (see table 2). All versions of SCO Unix from V3.2.2 to Open Server 5 are supported. The support policy for this version of Unix is described in section 3.0.4f of the Global Reseller Handbook Issue 19.

Note-3   GSM (Unix) for AIX V3.2.5 is now only available on a Windows format CD (see table 2). V3.2.5 is the only version of AIX version 3 that is supported. The support policy for this version of Unix is described in section 3.0.4f of the Global Reseller Handbook Issue 19.

Note-4   GSM (Unix) for HP-UX V11.0 is now only available on a Windows format CD (see table 2). HP-UX V11.0 is the only version of HP-UX that is supported. The support policy for this version of Unix is described in section 3.0.4f of the Global Reseller Handbook Issue 19.

Note-5   GSM (Unix) for AIX V4.3 is now only available on a Windows format CD (see table 2). AIX V4.3 is the only version of AIX V4.n that is supported. The support policy for this version of Unix is described in section 3.0.4f of the Global Reseller Handbook Issue 19.

Table-2 GSM (Unix) configurations after November 2002

Config. Code	Unix version(s)	C-ISAM Supported?	Distribution Media
5550	HP-UX V11.00	Yes	CD
5551	AIX V3.2.5	Yes	CD
5552	SCO Unix	Yes	CD
5557	AIX V4.3	No	CD
5590	HP-UX V11.00	No	CD
5591	AIX V3.2.5	No	CD
5592	SCO Unix	No	CD

Technical Note IN280 and the appropriate Configuration Notes, all of which are distributed on the CD, fully explain the various technical details.

All the GSM (Unix) BACNAT variants distributed via CD, and listed in table 2, support both dual 16-bit/32-bit operation and the interface to the Global Application Explorer (GX). That is, **32-bit applications and GX are now supported on the following variations of GSM (Unix):**

SCO Unix   GX supported by BACNAT variant 3.311, and later
HP-UX V11.0 GX supported by BACNAT variant 3.312, and later
AIX V4.3   GX supported by BACNAT variant 3.310, and later
AIX V3.2.5   GX supported by BACNAT variant 3.313, and later

Sales Bulletin GS203 details the new pricing policy for GSM (Unix) configurations.
