BULLETIN NUMBER GT960, 25 October 2019

Service Pack ZS60_000313 and tailored SOP Invoice/Credit Notes

Resellers who have tailored the SOP Invoice/Credit Note print (S.S1XPPR) should be aware that service pack ZS60_000313 has introduced an incompatible change to the calling interface. Unfortunately, this change was unavoidable.

Prior to SP ZS60_000313, entry point S1X%OH-PASS was called with single parameter:

ENTRY S1X%OH-PASS USING L-RTCB

After the application of SP ZS60_000313, entry point S1X%OH-PASS will be called with two parameters:

ENTRY S1X%OH-PASS USING L-RTCB L-CTIA

You should request the latest version of the S1XPPR report and update your tailored S1XPPR with the changes made to the standard DLM.
